

MICE block-diagram run plan for ISIS User Cycle 2017/02

Final r4

02-Oct-17

Revision history:

- r1 Updated to reflect arrival date of A. Bross and S. Feher (10Oct17)
- r2 Updated in response to first indication of LH2-fill time of ~10 days
 Indicates uncertainty arising from whether it is possible to advance the switch-on of SSD(M2)
- r3 Updated to reflect discussion at 14:00 on 18Sep17. Note that alignment and calibration is required and must be scheduled before the end of the Cycle.
