

MOM Handover

A. Dobbs (31st March – 13th April) to R. Gamet (14th April – 27th April)

- Daily walk about now handled by JG - no longer a MOM job
- Recent running went very well. New target speed worked great. Few issues:
 - ISIS guys wandered in during hall search → Close cage door when performing search. Discussed in hall meeting. Third man? Signage?
 - Beamstop juddering. Contractors in to look at it.
 - PPS got stuck at sounders time. HN fixed it...
- ISIS off until 25th April
- DSA opened to allow measurements for new proton absorber system (AN)
- Work carrying on for Hall AC units (JG handling)
- Moving spectrometer from R9 to Hall expected in last week of April
- Preparing for Step IV. Request by Ken for MOMs to produce a readiness study. Start by emailing the level 2's. Initial list of categories at <http://micewww.pp.rl.ac.uk/projects/operations/wiki/Step4RunningRequirements>
- New MOM phone on its way
