

## MAUS - Bug #1240

### xboa example data doesn't ship with Maus0.5

<b>Workflow:</b>	New Issue		
<b>Description</b>			
Running xboa/examples/Example4.py raises an error - third_party/install/share/ doesn't contain the usual xboa/data stuff. I copied the folder across from Maus0.4.1 and it worked fine though.

Fixed in r918

Somehow using parameters --root --prefix to python setup.py install on the command line was causing the share directory install to fail. Test server places it in the correct place however. Note this also fixed [#430](#), although I don't know why!
