Target version:	MAUS-v3.2.0		
Workflow:	New Issue		

Description

Hi,

I have been trying to install MAUS v3.2.0 but it fails. I attempted firstly to point it to the previous maus version (v3.1.2) for the third party software, and then a full installation. I am running on CentOS Linux release 7.5.1804.

I have attached the install.log file, for anything else required please let me know

Thankfully,

Gavriil Chatzitheodoridis

Hi,

if this is still the case please run

```
cd /home/ppe/g/gavchatz/MAUS3/MAUS-v3.2.0/  
source env.sh  
source third_party/bash/04pip.bash
```

and post the output.

#3 - 15 October 2018 11:46 - Chatzitheodoridis, Gavriil

- File installfull.log added

- File installno3rd.log added

- File sourcepip.log added

Hi Paolo,

I have attached the output of sourcing pip, the output of using the -t option (with 3rd party) and the output of a full install.

- Status changed from Open to Closed

- % Done changed from 0 to 100

hi Gavriil, we have sorted this out few months ago. Was due to numpy that needs a more recent version in MAUS.
