Description

Hi Paolo,

I'm trying to install the latest version of MAUS on Ubuntu 18.04 and can't get around the sconscpp/jsoncpp issue, with the installation failing.

I think I had a similar issue last year, but I can't remember who fixed it/got around the issue. It's a completely fresh version of Ubuntu and MAUS.

Kind Regards,
Craig

History

#1 - 23 May 2019 12:12 - Brown, Craig

- File *install.log* added

I didn't get it to work, but I have managed to get it to work on a Scientific Linux version.

Well, I did get the same fail as in bug 1959, but I think it still means MAUS is correctly set up, so I will use that.
