

MAUS - Bug #760

Fail to install on RAL PPD machines

21 October 2011 08:42 - Rogers, Chris

Status:	Rejected	Start date:	21 October 2011
Priority:	Normal	Due date:	
Assignee:	Tunnell, Christopher	% Done:	0%
Category:	Build System	Estimated time:	0.00 hour
Target version:	Future MAUS release		
Workflow:			
Description			
Do the full build with e.g. <code>install_then_build_then_test.bash</code>			
scons builds e.g. <code>MapCppSimulation.py</code> but fails to install them into <code>build/</code> directory			

History

#1 - 21 October 2011 08:44 - Rogers, Chris

e.g. after doing scons

Output from

```
ls build/*MapCpp*  
ls: build/*MapCpp*: No such file or directory
```

Output from

```
ls src/map/MapCppSimulation/build/  
MapCppSimulation.os  MapCppSimulation.py  _MapCppSimulation.so  MapCppSimulation_wrap.cc  MapCppSimulation_wra  
p.os
```

Assigned to Tunnell, I assume you can have a go using mousehole and you have a ral ppd account but if not I can have a look...

#2 - 21 October 2011 08:45 - Rogers, Chris

I should say this is with a checkout of the release branch (0.0.8)

#3 - 21 October 2011 18:19 - Tunnell, Christopher

What machine? Can repeat on:

```
[tunnell@heplnx108 ~]$ hostname  
heplnx108.pp.rl.ac.uk
```

but want to repeat on the exact same machine since sometimes there are oddities.

The trunk works on 105.

#4 - 25 October 2011 01:26 - Rogers, Chris

Probably dupe of [#770](#)

#5 - 25 October 2011 06:09 - Tunnell, Christopher

I'm going to close this since can't reproduce. Next time I look at least. I can try on a specific machine if we are sure it isn't a dupe.

#6 - 28 October 2011 14:16 - Ricciardi, Stefania

Hi,

I have got exactly the same behaviour as Chris R. on heplnx108. I tried also to install MAU 0.0.8 under my home directory, so I think there are no symbolink links in my directory path, but have not managed to get a running version yet. I do not understand why: the machine is the same as the one used by Chris T.

#7 - 28 October 2011 14:29 - Rogers, Chris

Stefania, can you raise the issue with RAL PPD IT support? They probably know whether their are funny features in the home directory paths better than we do. Otherwise I'll do it next week. Can you just say on here when you've done it.

#8 - 22 November 2012 07:38 - Rogers, Chris
