

MAUS - Feature #954

Multiple reducers

23 March 2012 20:49 - Rogers, Chris

Status:	Rejected	Start date:	23 March 2012
Priority:	Normal	Due date:	
Assignee:	Richards, Alexander	% Done:	0%
Category:	Online reconstruction	Estimated time:	0.00 hour
Target version:	Future MAUS release		
Workflow:	New Issue		
Description			
I couldn't figure out how to run multiple reducers in an elegant way. Looks like we need to run the application once for each reducer, duplicating the mappers. Is there a better way?			

History

#1 - 23 March 2012 22:04 - Rogers, Chris

Ah - I guess I do

```
$MAUS_ROOT_DIR/bin/user/reconstruct_daq_ckov_plots.py -type_of_dataflow=multi_process_merge_output  
$MAUS_ROOT_DIR/bin/user/reconstruct_daq_tof_plots.py -type_of_dataflow=multi_process_merge_output
```

I was running single threaded (just trying to get stuff working).

#2 - 28 March 2012 07:15 - Rogers, Chris

- Status changed from Open to Rejected

Looks like I figured it out
